

# Charging into a Shared Future

## RIDING IN AN ELECTRIC VEHICLE

There are generally two types of EVs: the plug-in hybrid (requiring a gas tank and internal combustion engine), and all-electric. If you didn't know about the many options requiring no gas at all, you're not alone:

# 52%

of new car buyers nationally have never heard of an all-electric vehicle.

# 14.2 miles

the average Portland commute, roundtrip.<sup>1</sup>

# 281

the number of fast chargers in Oregon, according to PlugShare, an app that helps you find them.

# 640 miles

the longest range for under \$30,000 with the Prius Prime plug-in hybrid. Most all-electric cars can go at least 100 miles.

# 30 min

the average time to charge up to 80 miles of range on a fast charger.

### Test drive and learn about EVs in a sales-free environment in downtown Portland.

The Go Forth Electric Showcase  
901 SW 1st Ave, Portland, OR USA
