

The Global Sustainable Mobility Partnership
*A network of independent, nonprofit organizations
with extensive experience in implementing zero-emission mobility.*

For Immediate Release

November 19, 2020

Portland, Ore. – [Forth](#), [uYilo](#), [Cenex](#) and [Cenex Netherland](#) are thrilled to announce the launch of the [Global Sustainable Mobility Partnership](#) (GSMP). GSMP is a network of independent, nonprofit organizations with extensive and practical real-world experience in implementing low and zero-emission mobility.

The mission of GSMP is to **drive zero-emission mobility solutions for all** and the partnership will work with regions, countries and cities in a consulting capacity to share best practices and lessons learned on mobility decarbonization strategies and programs. Together GSMP brings expertise in sustainable strategies, policies, programs and large-scale demonstration projects from Africa, Europe and North America. The four founding mission-driven members are located in South Africa, United States, Netherlands, and the United Kingdom, representing a range of geographic and cultural diversity with extensive regional knowledge.

Forth is thrilled to join with other mission-driven organizations to help countries around the world use clean, electric, smart mobility to strengthen their economies, clean their air, and promote more equitable transportation solutions. Every country deserves access to clean air and affordable transportation. – Jeff Allen, Executive Director, Forth

This partnership provides regions and cities in all corners of the world single-access to a great and diverse amount of expertise for their quest towards sustainable mobility. Joining the GSMP helps strengthen Cenex Nederland's mission to make the world a better place to live and travel in. – Esther van Bergen, General Manager, Cenex Netherland

The Global Sustainable Mobility Partnership is particularly enthusiastic to work with regions, countries and cities new to the zero-emission mobility space in order to support their transition to clean transportation. Visit www.gsmp.world to learn more.

Sustainable mobility is key to all developing countries. The Global Sustainable Mobility Partnership bridges like-minded organizations towards tackling the global climate crisis agenda. The uYilo eMobility Programme shares the vision of this partnership towards enabling a resilient future for generations to come, as 'uYilo' itself means to create in Xhosa (South Africa). – Hiten Parmar, Director, uYilo e-Mobility Program

Cenex is delighted to be a founding member of this new partnership. Working with other independent, nonprofit organizations means we can collaborate best practice and provide expert advice and support that is right for the local community and the environment as we accelerate the transition to sustainable, low emission mobility. – Robert Evans, CEO, Cenex.

###

Forth is a nonprofit organization advancing electric, shared and smart transportation through innovation, demonstration, advocacy, and engagement. For more information, visit forthmobility.org

Media Contact: Kevin Friedman – kevinf@forthmobility.org 503-381-4085
